PREFACE

Insurance in lay man's term means protection from financial loss. It is basically a way of managing risk against uncertain loss and proves to be a vital instrument for safety. In India, the insurance industry has transformed vibrantly, after liberalization, India has been viewed as one of the top emerging market, thus, opening opportunities for large insurance companies in the world to penetrate in the Indian market.

The growth of the insurance sector is viable only when the people understand the importance of insurance in their day to day life. While the urban population have invested in insurance policies, it is imperative to educate and create awareness about the benefits of insurance among the rural population. Insurance education helps a customer understand his/her needs and risks, the availability of insurance for managing risks, the importance of possessing an insurance product and knowing about the dos & don'ts before and after the purchase of an insurance policy. Insurance education, thus, helps to access the services of insurance sector in an informed manner and to promote market efficiency and flow of proportioned information for orderly growth of insurance industry. With more than two thirds of population living in rural areas and no access to insurance products, the insurance industry has to go miles to reach the unreached populous of the nation.

FACTS & FIGURES

The Insurance industry has registered **Rs.138657.31 crore** first year premium in the financial year 2016 i.e. **22.55%** higher compared to the previous year

The general insurance industry has registered **Rs.96393.94 crore** premium in FY 2016 i.e. **13.8%** more growth compared to the previous year.

ROLE OF TECHNOLOGY IN INSURANCE

Technology is disrupting many existing business models, and likewise has a significant impact on the insurance industry as well. Digital is not about incorporating technologies into the organization but reinventing the insurance organization, its culture to drive innovation, to drive change, to drive the business into the next generation. With rise in mobile users and cloud-based technology to social media interaction, insurance agents are finally realizing the need to be more agile, efficient and accessible in order to serve today's customer. As a result, insurance agents not only feel pressured to digitize their workflow, but also must streamline business processes to make the cost of doing business more efficient and in-line with these regulations.

THE ECONOMIC TIMES – INSURING INDIA

The Economic Times recognizes the significance of the Insurance sector due to increased contribution in the GDP and the well-being of the citizens and understands that development of this sector is crucial if India has to witness sustained development socially and economically. Given this, we are glad to present the third edition of the Economic Times Insurance Summit 2016.

THE SUMMIT AT GLANCE

This summit will take place on the 09th of December 2016 at Mumbai. This summit will seek together leaders from insurance industry to contemplate on relevant topics like policy & regulatory changes, insurance in financial inclusion, technology and consumer awareness strategies. With deliberations revolving around Global Trends, Technology, Regulations, Customer Engagement, etc. this summit will have panel discussions, keynote address, case study, parallel tracks & roundtables.

A TOUR OF THE CONTENT & KEY DISCUSSIONS

Future of Insurance Industry – Keynote Address

India's insurable population is expected to reach 750 million in 2020, with the life expectancy reaching 74 years. The future looks promising, and this session will highlight the changes in the regulatory front that will help pave the success of reaching the millions. It will elaborate on few schemes undertaken by the government like the Pradhan Mantri Jeevan Bima Yojana, Pradhan Mantri Suraksha Bima Yojana, Rashtriya Swasthya Bima Yojana & Universal Health Insurance Scheme.

Global Trends on Regulation – Panel Discussion

The regulatory landscape for insurance all over the world will continue to face significant challenges in the coming years, with insurers facing new or modified rules, regulations and requirements that could considerably affect how they do business. In some regulatory areas, the requirements have been clarified over the past year and companies are now focusing on compliance and refinement. In other areas, regulations are still emerging or evolving and companies are looking for clues to help them prepare. This session will discuss about what strategy that has to be adopted overall to grow commendably.

Inclusive Session

In this session the participants will be divided into group each group of 10. Each group will be given a problem solving situation to which every group will have to come up with innovate solutions. For this each group will be given 15 minutes each, post which, a member from the group will

Technology: InsurTech: The fusion of Insurance & Technology, road to Innovation – Panel Discussion

Today insurance companies look at profitable growth, while effectively meeting their customer expectations. The use of technology will help in achieving the desired goals and customer demand. Given this, the session will discuss about the role of technology and its new trends. How to leverage technology for business innovation? How to innovate effectively? The use of IoT and its benefits for identifying customer needs. The use of Big Data to improve the claim process and eliminate fraud.

Life Insurance & General – Parallel Tracks & Panel Discussion

The insurance sector has registered a considerable growth in the last year, with every passing year there new challenges and there would be a need to find new answers to it. This session will highlight the current challenges faced by the life insurance industry like introducing new products to meet the needs of the people, the need for educating the masses about insurance, reaching the untapped market, how will technology help in doing so, etc. and will bring out the relevant solutions to the problem.
